

## **Landing page**

Here the user will be able to create a new account (sign up) and log into an existing account (sign in).

## **Dashboard**

Here the user will be able to view all of their goals and their progress bars, add a new goal, and interact with the goals: set notifications, delete them, and edit existing goals (by redirect to "add new goal" page with all the fields already filled in with the data from the existing goal - when saved, this new goal will overwrite the old one).

## **Edit / add new goal page**

Here the user will be able to add a new goal or edit an existing one by filling out the fields in a form.

## **Goal overview page**

Here the user will be able to view the goal in detail, and break it up into smaller tasks by adding "achievable targets", which will take a form of a table. The goals in the table will be editable (when the user clicks "edit", all the fields in that row of the table are made editable, and the "edit" button is replaced with a "save" button).
